

# Hello,

My name is Christian Ludovic Talekeufouet, 22 years old and resident in Trabzon, Turkey. I've been working in the UX/UI Design field for 2 years now, and my stints in a number of companies have given me a lot of experience in the field, especially my time at Ejara.

## Education

First of all, I spent two years training at the Bandjoun University of Technology in electrical engineering before moving into the tech field. Then I took a self-taught course in UI UX and I'm currently at engineering school in software engineering. However, my academic training doesn't prevent me from managing freelance projects or even working in remote, part-time jobs.

## Skills

 Mid level

 Junior level

 Mid level
